## Professional Summary

Senior Software Engineer with 9+ years of experience building scalable fintech, SaaS, communication, and desktop applications. Specialized in React, TypeScript, Node.js, Java, ElectronJS, distributed systems, microservices, microfrontend and cloud-native architectures. Proven track record of leading engineering teams, designing secure payment systems, integrating banking APIs, and scaling products from MVP to enterprise adoption.

**Core Strengths:** Fintech • Payment Systems • ReactJS + Node Express • Frontend Development • Microservices • Microfrontend • System Design • Technical Leadership • ElectronJS • Full Stack Development

## Technical Skills

**Frontend:** React, Angular, VueJS, TypeScript, JavaScript, Redux, MobX, Socket, SSE

**Backend:** Node.js, Node Express, Java, REST APIs, GraphQL, Socket.IO

**Cloud:** AWS (Lambda, S3), Transcoder, Docker, CI/CD, Kafka, RabbitMQ

**Databases:** PostgreSQL, MySQL, MongoDB, Redis, DynamoDB

**Desktop:** ElectronJS, Auto Updates, App Distribution

**Practices:** System Design, Microservices, Agile, TDD, Security, Code Reviews

## Professional Experience

*Senior Software Development Engineer IV at Avalara*

2024 – Present

- Leading engineering initiatives for a fintech platform handling payments, banking integrations, and compliance workflows.
- Designed secure payment infrastructure using tokenized payment links, UUID-based authorization, and short-lived JWT authentication.
- Integrated Plaid, Treasury Prime, Tabapay, Sardine, Socure, Middesk, and QuickBooks.
- Implemented automated loan repayment and ACH workflows.
- Delivered zero-downtime migration of banking services from Grasshopper Bank.
- Strengthened platform security using Evervault encryption and advanced KYC/KYB verification.

*Technical Lead at Simform*

2019 – 2024

- Led architecture and development of Hopscotch, a fintech platform that scaled from MVP to enterprise stage following \$10M+ funding.
- Managed end-to-end delivery across frontend, backend, infrastructure, and third-party integrations.
- Designed microservice and micro-frontend architecture for independent team scalability.
- Implemented encrypted real-time communication systems using Socket.IO.
- Integrated payment, compliance, analytics, customer support, and fraud prevention platforms.
- Mentored engineers, conducted technical interviews, code reviews, and sprint planning.

*Senior Software Engineer at Biztech*

2017 – 2019

- Led JavaScript engineering initiatives across web, desktop, and mobile platforms.
- Developed enterprise applications using Angular, Ionic, and ElectronJS.
- Built Water Expert IoT platform, reducing manual maintenance effort by 60%.
- Established CI/CD pipelines and automated deployment workflows.
- Mentored junior engineers and introduced engineering best practices.

## Key Products Delivered

**Avalara Capital:** Platform that helps businesses access strategic capital through a purpose-built line of credit. Tech Stack: React, TypeScript, Java, Node.js, Express.js

**Hopscotch:** Fintech platform supporting payments, banking integrations, compliance, KYC/KYB verification, and risk management. Tech Stack: React, TypeScript, Java, Node.js, Express.js

**YAC:** Electron-based asynchronous voice collaboration platform with screen recording, audio messaging, and team collaboration capabilities. Tech Stack: React, Vue.js, TypeScript, Electron.js

**Newton Mail:** Cross-platform email client supporting email synchronization, advanced search, and productivity-focused workflows across multiple devices. Tech Stack: React, TypeScript, Electron.js

**Water Expert:** IoT-based monitoring and analytics platform for industrial equipment, enabling real-time monitoring, maintenance tracking, and operational insights. Tech Stack: AngularJS, TypeScript, React Native

## Leadership Highlights

- Led engineering teams and mentored junior developers.

- Conducted sprint planning, architecture reviews, and technical design discussions.
- Built scalable Front-end and Backend architecture , CI/CD pipelines and release automation processes.
- Experience building enterprise applications with React and Node.js (Backend), and hands-on development experience with Java.

## Education

---

### **Bachelor of Science in Information Technology and Computer Research (B.Sc. (CA & IT))**

*K. S. School of Business Management and Information Technology, Gujarat University*

2011 – 2014

### **Master of Science in Information Technology and Computer Research (M.Sc. (CA & IT))**

*K. S. School of Business Management and Information Technology, Gujarat University*

2014 – 2016

## Certifications

---

### **Professional Certificate Course in Generative AI and Machine Learning**

*Indian Institute of Technology, Kanpur*

2025 – 2026

### **Leadership Skills**

*IIMA - Indian Institute of Management, Ahmedabad*

2025 – 2025

### **Master Electron: Desktop Apps with HTML, JavaScript & CSS**

*Udemy*

2021 – 2021
